Order from LC or SLA m\$1.80, ph\$1.80 61-15668

Abstract trans. of Moscow U. Vestnik. Seriya  
Kimiya (USSR) 1960 [v. 15] no. 4, p. 19-20.

Generally the dividing line between explosive and  
nonexplosive mixtures is the same for the metallic  
containers as it is for the glass ones. However, the  
stability of the mixtures is approximately 25% greater  
in the metal containers.
